Foreword

The Defense Energy Support Center (DESC), has been directed to Capitalize selected U.S. Army locations. Capitalization of these locations will encompass current Army business practices and will allow for the transition to the single stock fund concept.

It should be noted that not all product stored at these location will be capitalized (DLA Owned), as capitalization is driven by the number of end use customers. Product purchased under a DESC direct delivery contract with a commercial vendor such as some gasoline or diesel fuels, are sold to the military service at the time of delivery. This product is considered service owned product. Order and receipt documentation for these deliveries is provided to DESC-FII as required by DESC's direct delivery contracts. Locations not sure of how to report product activity should contact DESC-FII for clarification.

Capitalization Preliminaries

The process of capitalization requires detailed preparation in order to allow for the smooth transition from Army owned to DLA owned product and to enable accurate billing of end use customers under the current Army business process. To accomplish this requires basic information about products, customers and storage facilities. The following paragraphs provide detailed instruction for providing this information to DESC. It includes:

- ☐ Identification of Customers
- ☐ Assignment of Responsible Officers
- ☐ Request For Logons and Passwords
- ☐ Identification of ground fuel products
- ☐ Inventory Capitalization Procedures

Identification of Customers

Most customers are classified as DoD customers and have a valid DoDAAC assigned by the Defense Automatic Addressing System Center, OH (DAAS Center). DESC loads DoDAACs validated by DAAS into DFAMS to assure that bills are sent to the proper location. Sales to DoD customers require a DAAS valid DoDAAC. Activities may check DoDAACs on the DAAS Center database at the following website: <http://daynt6.daas.dla.mil/dodaac/>

In some cases the Army is required to sell product on a cash or credit basis to non DoD customers. To accommodate this, DESC will assign a DoDAAC which will allow for proper billing. Identification of customers is critical for developing these DoDAACs therefore, activities scheduled to be capitalized must identify these unique customers by:

- ☐ DoDAAC Currently being used.
- ☐ Customer Name
- ☐ Bill To Address

When this information is compiled it must be submitted to DESC-FII, Attention Beth Morgan for assignment of a DoDAAC.

Obtaining RIC's and DoDAAC's

Glossary Of Terms

TYPE - Type of transaction.

DOCUMENT NUMBER – Also known as requisition number - this field contains a unique identifying number that is made up of three basic elements: (1) the DoDAAC of the requisitioning activity, (2) the Julian date that the requisition is placed and (3) a locally assigned serial number. For the Air Force the last four record positions of the document number will be the last four digits of the aircraft tail number. For the Navy the last four record positions will be the last four digits of the DD 1898 form number. (Example Document Number: N62481-2022-6500)

GRADE - Three digit code used to represent the fuel type.

FUND CODE - a two digit code that is assigned by the service activity to indicate to DESC that funds are available to pay the fuel charge. (ex. 61, 39, UZ, K9, etc.) Fund codes should be obtained from the local resources Management Office / DFAS OPLOC. The source for fund codes is DoD 4000.25-7-M-S-1 which is available at Website:
http://daynt6.daas.dla.mil/daashome/daasc_reports.htm - publications

MODE OF SHIPMENT - Identifies the method of transportation for movement of product (ex. "A" = tank truck, "Z" = tanker, "W" = commercial barge, "9" local sale, "8" pipeline)

NSN (National Stock Number) - Unique identification number that is assigned to each type of fuel by the Federal Catalog System (ex. JP5 = 9130-00-273-2379)

QUANTITY - The amount of fuel in gallons. **Do not use leading zeros.** This field may be labeled "Quantity" or it may be more specific such as "Gain/Loss Quantity" or "Quantity Shipped," etc.

ROUTING IDENTIFIER CODE (RIC) - A unique, 3 character code that is assigned to each DFSP, DICP, DER and many retail activities. This field is very important since it tells the computer which activity input the transaction. it routes transactions to the appropriate DFSP and ensures that rejects, suspense, and management notices are returned to the correct DFSP. (ex. NNB, T3I)

SIGNAL CODE - A 1 character code that designates which DoDAAC is to receive the fuel and which DoDAAC is to be billed. It is used in conjunction with a fund code. (ex. A, B, J, etc.)

SUPPLEMENTARY ACTIVITY ADDRESS CODE (SUPAAC) - DoDAAC of the receiving activity or DoDAAC of the activity to receive the bill depending upon the type of transaction.

SUPPLY TRANSACTION DAY - The Julian date that the action occurred, not the date it was entered into DFAMS. depending upon the type of transaction, the date field will have various names such as: "Day Commenced Discharge/Pumping," "Inventory Adjustment Day," "Shipment Day," etc. (ex. 034, or 233).
